

# AUTOMATED KEY CONTROL WITH ACCOUNTABILITY

The Keys to your Business are one of the most important assets. Without access to keys you can't access your business. Keys access your doors, filing cabinets, lockers and other valuable assets,

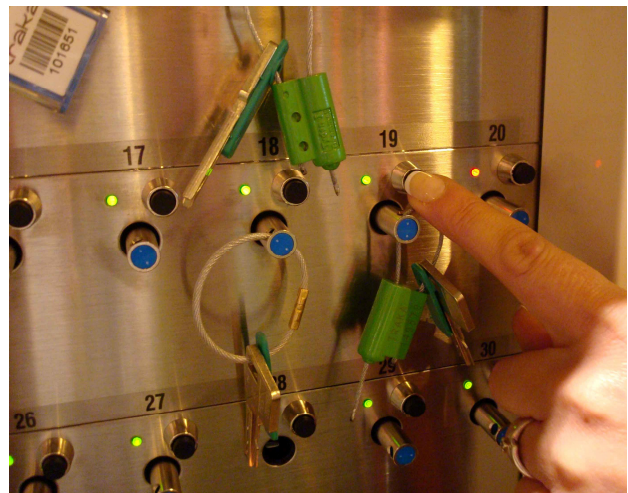

## Secure Asset Management Solutions

How do you look after them? Do you know whose using them?

Traka electronic key management systems provide the perfect solution. Simply attach your keys to the Traka iFobs using our special security seals and return them to the Traka cabinet. From now on Traka will ensure that only authorized staff are allowed the keys and that every key taken will be recorded automatically showing user name, date and time.

The iFobs can actually lock into place, so not only does Traka control who has access to the cabinet but also which specific key a user is allowed to take.

Access to Traka is by PIN, card or biometrics and we can even offer you compatibility with existing access cards.

Scalable for the unique needs of your facility the Traka Key Management system offers space-saving, expandable styles to accommodate thousands of keys with modular storage options for specialized industry requirements. These customizable key control systems provide unsurpassed storage, flexibility and convenience, making them a must have solution for:

- Casino and Gaming Facilities
- Hospital and Health Care Facilities
- Correctional Facilities
- Corporate Buildings
- Government Facilities
- Water Authorities
- Hotels & Resorts
- Conference Centers
- Multifamily Buildings
- Educational Institutions
- Automotive Centers
- Power Plants
