Our Stanchions Will Help Wait Lines Move Faster And More Efficiently

Our retractable barriers play an important role in protecting your display products and also make great crowd control barrier posts for all your patrons and customers. Stanchions are normally placed near doorways and entrances and around objects that need to be protected from the general public. You will find that the control barriers will speak for themselves as people will easily read the interior-scape of your premises and be able to guide themselves through the guided stanchion posts area. Our stanchions are in use in many facilities across North America including Banks, Retail Outlets, Government Facilities, Health Care Centers, Colleges and Universities, Airports, Train Stations, Gaming and Casino Facilities, Dining Facilities, Clubs etc.
